Strong Yields

Good Traffic Tolerance

Excellent Value

AGRONOMIC CHARACTERISTICS

Fall Dormancy	4.0
Winter Survival	2.2
Root Type	Tap
Early Seedling Growth	Very Good
Spring Vigor	Excellent
Summer Re-growth	Aggressive
Fineness of Stem	Fine
Forage Yield Index	Very Good
Forage Quality	Excellent
Traffic Tolerance	Very Good
Fineness of Stem	Fine

PEST RESISTANCE RATINGS

Bacterial wilt	HR
Fusarium wilt	HR
Phytophthora root rot	HR
Verticillium wilt	R
Anthracnose (Race 1)	R
Aphanomyces root rot (Race 1)	R
Stem Nematode	R
Northern root knot - Nematode	HR
DISEASE RATING INDEX	27

Insect Resistance

Pea Aphid	R
Spotted Alfalfa Aphid	R
Blue Alfalfa Aphid	MR

ABUNDANCE ALFALFA PLANTING GUIDE

Seeding Rate:	15-20 lbs./acre
Seeding Date:	Spring or before August 15
Seed Treatment:	Apron
Package Size:	50 lbs.
Pre-Inoculated:	Nitragin Gold

Features & Benefits of Abundance Alfalfa

Abundance is high yielding, persistent alfalfa. It has first place finishes in Kansas, Nebraska, Wisconsin, Washington, Oklahoma and Minnesota University Trials. Abundance was first or statistically equal to the first place entry in 24 out of 39 university forage yield trials it was entered. Abundance had the best forage production in a Nebraska wheel traffic study, showing it's excellent traffic tolerance. Abundance's forage quality is among the best in the industry. Agronomically it offers a sound disease and insect resistance package to maintain performance in adverse environments.
