

**Grazer EXTRA Brand Alfalfa** is a deep crowned, high forage yielding variety. It carries the sunken crown trait, which helps insulate the crown in severe winter weather. The sunken crown also helps protect the crown from equipment wheel traffic and animal hoof damage. Grazer EXTRA expresses quick re-growth after cutting with an upright growth habit.

**Grazer EXTRA** has exceptional forage quality capabilities along with an excellent disease, insect and nematode resistance package.

## Sunken Crown Trait!

### AGRONOMIC CHARACTERISTICS

Fall Dormancy	3
Winter Survival	2
Root Type	Tap
Crown Type	Sunken
Cutting Recovery	7.9*
Yield Level	8.2*
Forage Quality	7.9*
Wheel Traffic	8.3*
* 1-9, 9 is best	

### PEST RESISTANCE RATINGS

Bacterial wilt	HR
Fusarium wilt	HR
Verticillium wilt	HR
Anthracoese (Race 1)	R
Phytophthora root rot	HR
Aphanomyces root rot	R
Stem Nematode	R
<b>DISEASE RATING INDEX</b>	<b>28</b>

*Based on the University of Wisconsin disease resistance index (DRI) Grazer EXTRA Brand Alfalfa has a DRI of 28 out of a possible 30 points*

**Grazer EXTRA features a sunken crown structure to tolerate heavy traffic conditions - whether from equipment or from grazing animals. Grazer EXTRA's crown structure is unique from other alfalfas in that it is placed 1 to 1-1/2 inches below the soil surface (conventional alfalfas are 1/2 to 3/4 inch). Its strong disease package helps fight infections that would otherwise damage crowns.**

### Grazer EXTRA Brand ALFALFA PLANTING GUIDE

Seeding Rate:	15-20 lbs./acre
Seeding Date:	Spring or before August 15
Seed Treatment:	Apron (protection against seedling diseases)
Package Size:	50 lbs.
